Allergy Risk Assessment	Yes	Yes	Yes	Yes
Hepatitis B Vaccination (See Note 1)	No	No	No	See Note 2
Rabies Vaccination/Titer	No	See Note 3	No	See Note 3
Measles Vaccination/Immunity	No	No	No	Yes
Q-fever titers	No	No	See Note 4	No
Toxoplasmosis titers	No	See Note 5	No	No
Negative Tb test	No	No	No	Yes
Pre-employment Physical (See Note 6)	No	No	No	No
Annual Physical (See Note 6)	No	No	No	No
Post-employment Physical (See Note 6)	No	No	No	No
Pulmonary Function Test (See Note 6)	No	No	No	No
Respirator Fit Test (See Note 6)	No	No	No	No

NOTES:

- Hepatitis B vaccination is required for work with human tissues, blood, or bodily fluids.
- Hepatitis B vaccination is required for work with great apes (*e.g.*, chimpanzees).
- Rabies vaccination is required for work with random source (Class B) dogs and cats, feral carnivores, bats, wild skunks, imported wild caught non-human primates while in quarantine, or the Rabies virus. Also, required for Animal Resource individuals.
- Q-fever titers are required for work with female sheep/goats (including the placenta, amniotic fluid, blood, or soiled bedding) or directly with the *Coxiella burnetti* organism.
- Toxoplasmosis titers are required for females of child-bearing age that work with random source or feral cats.
- May be required for ABSL-2 or ABSL-3 work.
