

Bulb Recycle Containers: Purchasing Process

Containers may be purchased using the current FY Standing Work Order, which is already set up through FM Operations and Maintenance. This work order number is held at the supply counter located in the facilities services building #079.

Purchasing bulb recycle boxes, filament tape (String Tape) should be used for securely sealing boxes. This tape is offered at the supply warehouse and upon request may be charged to the same work order as the box itself.

Once a container is packed in accordance with the Instructions for shipment below, the customer may either take the container to UMS to have it shipped out, or bring it back to the supply warehouse and we can have it routed over to UMS to have it shipped out.

Bulb recycle containers may be purchased by any department on campus, excluding departments requesting to purchase in bulk. Bulk orders should be purchased using project funding.

Lamp Containers: WasteSecure® Instructions For Shipment

1 BAG

Securely tape all edges of the bottom end of the brown inner box and insert into the plastic bag.

2 TAPE

Fold flaps 1, 2, 3 and 4 on the bottom, of the white printed outer box and completely seal with tape where indicated with the dashed lines.

3 SLIP

Slip the inner box with the plastic bag liner into the white printed outer box.

4 FILL

Carefully fill the inner box with lamps. Keep the container closed during storage

5 SEAL

When full, fold and seal end flaps of the inner box. Seal the bag, then fold flaps 1, 2, 3 and 4 of the outer box and completely seal with tape where indicated with the dashes lines. **Do not cover the return shipping label.**

6 SHIP

For FedEx Ground, call 800-463-3339 option 0 to order free pickup or place container in the area FedEx picks up.

APPROVED CONTENTS
Fluorescent and other mercury containing lamps

ADDITIONAL CHARGES
Additional charges may apply if you ship:

- Non-approved contents
- Incorrectly assembled container
- Container weighing more than 50 lbs

SHIPPING GUIDELINES

- The container must be properly sealed, structurally sound, compatible with the contents, and must lack evidence of leakage or damage that could cause leakage under reasonably foreseeable conditions.
- The container must only contain its approved contents.
- Total container weight must not exceed 50 lbs.
- Pickup must be from a business address within the continental United States.

MINISECURE
The MiniSecure container does not come with an inner box.

TAPE
To secure the box, we recommend using 3" fiber reinforced packing tape. Do not use masking tape.

BAR-CODED DOCUMENT
Retain the enclosed bar-coded document with container number and pass code for tracking and documentation.

PREPAID RETURN SHIPPING
Return shipping is included in the purchase of every container.
